STRAIN TALK AK-47

65% Sativa /
35% Indica

Despite its intimidating name, AK-47 possesses very peaceful characteristics. The effects of AK are immediate and long lasting, offering an alert yet comfortably mellow experience. The aroma is skunk-like with a smooth and delicious tangy flavor. During cultivation, this variety has a surprisingly quick finishing time for being a sativa dominant hybrid. *Pure Analytics™* test results have revealed that AK-47 has over 20% THC content!

Cannabis Testing Services Now Available With *Pure Analytics™*

Organicann now tests all of their medical cannabis products for active ingredients and possible contaminants, such as mold and fungus. We are offering this exciting technology to our patients and cultivators.

Testing for *tetrahydrocannabinol* (THC) reveals the overall potency and mental effect of your cannabis. We will also test the levels of *cannabidiol* (CBD) to assess the potential for pain-relief, and *cannabinol* (CBN) to assess quality.

Your cannabis can also be screened for mold and fungus which may cause allergic reactions, lung infections and digestive issues. Screening for these qualities is even more affordable.

TIP OF THE MONTH:

Summertime Safety Tips

How to stay safe attending summer festivals with your medicine.

1. Always carry a copy of your valid doctor's recommendation and I.D.
2. If you are traveling through different counties, it's best to stay within the CA default limit of 1/2 oz. dry cannabis.
3. DO NOT use your medicine in your car while waiting for admission. If attendants smell it, they will search your entire vehicle.
4. Festival parking lots are patrolled by security. Don't camp in your car or conduct any suspicious activity in the parking lot.
5. While at the festival, smoke in designated smoking areas only, being respectful of children and non-smokers.
